

# H.E. Anderson Company

## SP Series Solenoid Pumps

*Building the Best Injectors for Over 50 Years*

H.E. Anderson Co. is proud to introduce the new SP Series Solenoid Pumps. These new pumps work great for injecting precise amounts of chemicals in low flow applications and are electrically operated so they produce no waste water. The SP Series Pumps are compatible with the new J Advanced controller and work with our existing injection point fittings and suction tubes. Certain models can be used independently from a controller as well. Micro dosing capability can reduce the need for a blending tank in certain applications. These pumps are ideal for pH adjustment and sanitation injection as well as many other applications where small injection rates apply.

Please call or email with any questions.

# Typical SP Solenoid Pump Installation

## Features

- Electrically powered, no waste water
- No sliding seals
- Works at higher pressures than peristaltic pumps
- Works with existing equipment
- Easy installation and operation
- Accuracy and dependability
- Expandable and flexible
- 24 month warranty

## Specifications

Model	SP-15P-VCP	SP30P-VCP	SP-45P-VC	SP-15M-VCP	SP-30M-VCP	SP-45M-VCP
Max. Injection Rate	15 GPD	30 GPD	45 GPD	15 GPD	30 GPD	45 GPD
Diaphragm	Teflon					
Embedded Controller	No	No	No	Yes	Yes	Yes
Operating Pressure	0 psi to 125 psi					
Water Temp	33° to 140° F					
Power	120 VAC
